

Chev/GMC Duramax 6.6L

Part # GM8424/GM8425

PERFORMANCE EXHAUST

NEW PRODUCT RELEASE

Chev/GMC Duramax 6.6L 3" Turbo Down Pipe

- New Improved Design
- Greater Heat Retention
- Greater Flow Over Stock
- Richer Diesel Sound
- Quicker Throttle Response

Give your LLY, LBZ or LMM Duramax powered vehicle maximum exhaust flow by replacing the restrictive factory down pipe with MBRP's turbo direct replacement. Mounted between your factory turbo and your exhaust system they feature full 16 gauge mandrel bent tubing for maximum flow. The bonus is that while lowering your EGTs these pipes deepen the sound of your V8 diesel and provide quicker throttle response.
