

PERFORMANCE EXHAUST

NEW PRODUCT RELEASE

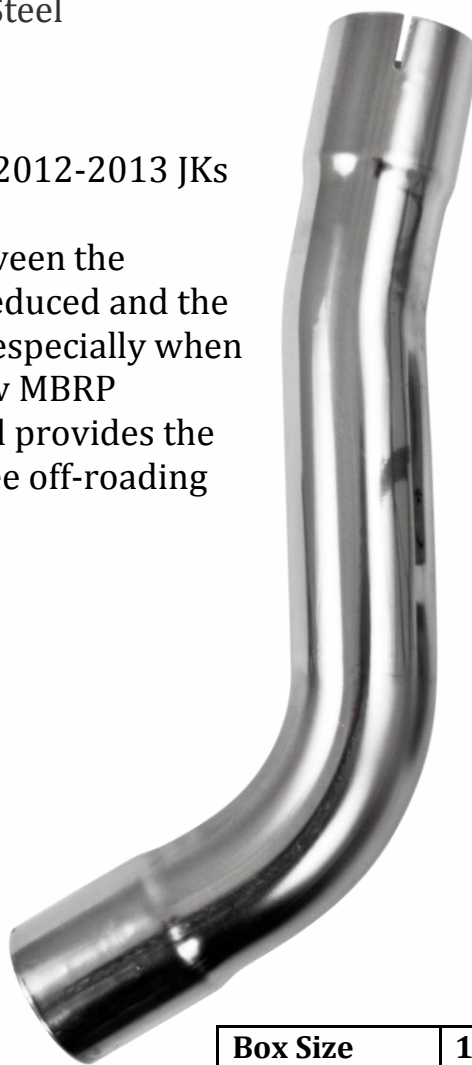

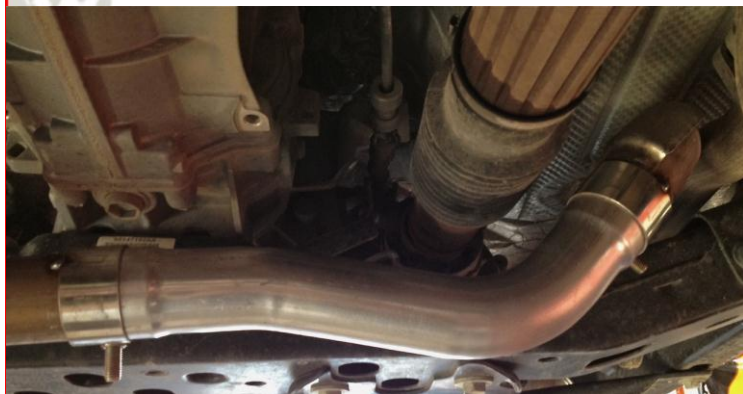

**2012 - 2013
Jeep Wrangler/Rubicon 3.6L V6
Part # JS9001**

Jeep Wrangler/Rubicon 3.6L V6 Clearance Adapter for Y-Pipe

- Use on a lifted vehicle to give the front axle more clearance
- Constructed in rugged T409 Stainless Steel
- Mandrel Bends for Smooth Flow
- Band Clamps Included

The new 3.6L Pentastar power plant on the 2012-2013 JKs changed the positioning of the stock Y-Pipe.

When a lift kit is installed the clearance between the exhaust and the driveshaft is dramatically reduced and the risk of contact damage is greatly increased, especially when travelling in rough off-road terrain. This new MBRP Clearance Adapter pipe is a direct install and provides the necessary clearance you need for trouble free off-roading with your lifted JK.

Box Size	14.0 x 7.0 X 7.0
Weight	4 lbs.
Date Issued	November 20, 2012
